

REYMOND P. JOAQUIN

IT Support / Help Desk

San Jose del Monte, Bulacan • 09302794074 • raymondjoaquin50@gmail.com • [reymondjoaquin.netlify.app](#)

PROFESSIONAL SUMMARY

I'm an ICT graduate with BSIS coursework and hands-on experience from IT Support OJT, freelance work, and technical projects. I'm familiar with Windows/Linux, hardware and software troubleshooting, networking, scripting, and web technologies. I'm looking for an entry-level Help Desk or IT Support role to build real-world experience and grow my skills.

EXPERIENCE

IT Support OJT / Technical Support Trainee

Headwaters Elizabeth Campus | 2023–2024

- Assisted students with computer and software-related issues and provided basic technical support.
- Performed PC reformatting, software installation, system configuration, and basic hardware troubleshooting.
- Assisted with computer laboratory maintenance and basic network setup.

Independent / Freelance Developer

Project-Based Work | 2025–Present

- Developed and modified web and Java-based applications based on client requirements.
- Troubleshoot application issues and implemented fixes based on reported bugs and functionality requirements.
- Communicated with clients to understand requirements, provide revisions, and deliver working solutions.

TECHNICAL SKILLS

- IT Support & Troubleshooting** — Windows Installation & Configuration · Hardware & Software Troubleshooting · PC Performance Troubleshooting · Application & Driver Installation · Basic PC Assembly
- Networking** — IP Addressing & Configuration · Subnetting · Network Diagnostics
- Operating Systems & Command Line** — Windows · Linux / Kali Linux Command Line
- Programming & Web** — Python · JavaScript · HTML · CSS

PROJECTS

PhishNet AI — Web-Based Phishing Detection & Awareness System

HTML · CSS · JavaScript · Node.js · Express.js · PostgreSQL · AI API

- Developed the system end-to-end, implementing the frontend, backend, database, authentication, and AI assistant integration, while handling technical documentation and presentation.

IPNetSolver — Network Subnetting CLI Tool

Python

- Built a CLI tool to automate IP subnetting calculations, supporting FLISM, VLISM, supernetting, and IP/binary conversion.

EDUCATION

La Concepcion College — Kaypian Campus — Bachelor of Science in Information Systems, coursework through 2nd Year

Headwaters Elizabeth Campus — Senior High School, TVL-ICT
